

Instructions Page

How to Print

1. While in this document, click on the printer symbol (or press Ctrl + P on your keyboard)
2. Now, you should be in the printer settings menu, select your desired printer

Ideal Printer Settings

1. Enable the printing on both sides setting
2. Make sure the print on both sides option is set to "Flip over long edge"
3. Layout should be "Portrait"
4. Pages: 3- (or "All" if you want these instructions printed for some reason)
5. Color: Black and White
6. Paper Size: Letter

FAQs:

Q: Why are some of my Quizlet flashcards not appearing in the PDF?

A: This can be due to quite a few reasons. The main cause of this is usually if the term or definition side of the flashcard is just a picture (with no text). Our tool currently does not have the capability to include pictures on the flashcards.

Q: Why is the text on one of my flashcards really small?

A: This is caused by one of the words in either your term side or definition side being very long. For example, the word "pneumonoultramicroscopicsilicovolcanoconiosis" (yes that's a real word) is going to appear very small on just one line of the card. This is mainly because our tool ensures that single words are never split up at the end of the card's lines to ensure maximum readability (unlike Quizlet's printing tool).

Q: How do I print these flashcards on a single sided printer?

A: Although strictly single printers are quite outdated nowadays, they still exist. Our tool currently does not support single sided printing inherently, but there are workarounds you could do to still print these double sided flashcards. The easiest way is to first select the "Even Pages Only" setting in the printer settings menu and then print. Then, with the newly printed pages, put them back into the print and now select the "Odd Pages Only" setting and print. If these steps are too confusing, check out [this video](#).

These are all problems that can be fixed in future development of this extension. I do keep this project open source, so if you would like to contribute, you can do so [here](#).

Thank you for using QuizCards! Good luck studying!

This is a filler page, please start printing at page 3.
